- DVS – 4" by 6"   96100300
- DVS – 8" by 10"   96100301
- DVS – 10" by 13"   96100302
- DVL – 4" by 6"   96100320
- DVL – 8" by 10""   96100321
- DVL – 10" by 13"   96100322

Arched Faces with Screens (2014 or later) Require Use of the Extended Position Holes

This surround panel has 2 sets of holes. Hole position is determined by the face being used (see below)

Standard Position – used for all faces except for the new 2014 arched faces with screens. All other faces use the standard position hole. If you are uncertain, use the standard position.

Extended Position – used only for new arched faces with screens (2014 or later). The extended position allows room the screen and eliminates the ½" gap to the panel. The extended position hole positions the insert ½" farther into the fireplace cavity.

DVS Side Panel / DVL Side Panel — Extended Position / Standard Position

## Rheostat and On/Off Switch Placement on 33 DVI/31 DVI

Install the rheostat and On/Off switch on the right surround side surround panel (see the Owner's Manual for details).
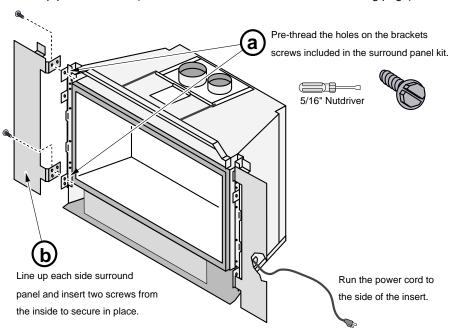

Inside Fit Panels

The panels may be cut down in size and placed within the fireplace opening. When installed in this configuration, install the rheostat and on/off switch in the control panel under the firebox (see the owner's manual for details). For standard installations, we recommend you attach the rheostat and on/off switch to the upper right surround panel trim (after the trim is installed).

Installation

Before installation the insert should be in place with the gas line and vent attached. Pull the insert out slightly to assist in the installation. Attach the side panels then the top panel and trim (see the directions below and on the following page).

DVS / 31 DVI
Side Panel Installation

(a) Pre-thread the holes on the brackets screws included in the surround panel kit.

5/16" Nutdriver

(b) Line up each side surround panel and insert two screws from the inside to secure in place.

Run the power cord to the side of the insert.

TRAVIS INDUSTRIES
HOUSE OF FIRE

DVL / 33 DVI – Side Panel Installation

a Pre-thread the holes on the surround panels with the screws included in the surround panel kit.

5/16" Nutdriver

b Line up each side surround panel and insert two screws from the inside to secure in place.

Run the power cord to the side of the insert.

Top Panel and Trim Installation

Top Trim

Top Panel

Spring Clips

"L" Bracket

Slot for on/off switch and hole for rheostat (31 & 33 DVI Only)

Right Side Trim

a Install the top panel so the tabs insert into the joggle clips on the top panel

b Micro (1/16") Standard Screwdriver

Top Trim

"L" Bracket

Right Side Trim

Trim Installation:
Insert one leg of each "L" bracket into the top and side trim piece. Align the trim to form a precise corner, then tighten the two set screws with a small standard screwdriver. Slide the trim over the panels. Place the spring clips behind the panels at the locations shown. This keeps the trim tight against the panel.

Optional Knock-Out
An optional knock-out is provided if the power cord is routed behind the surround panel.
